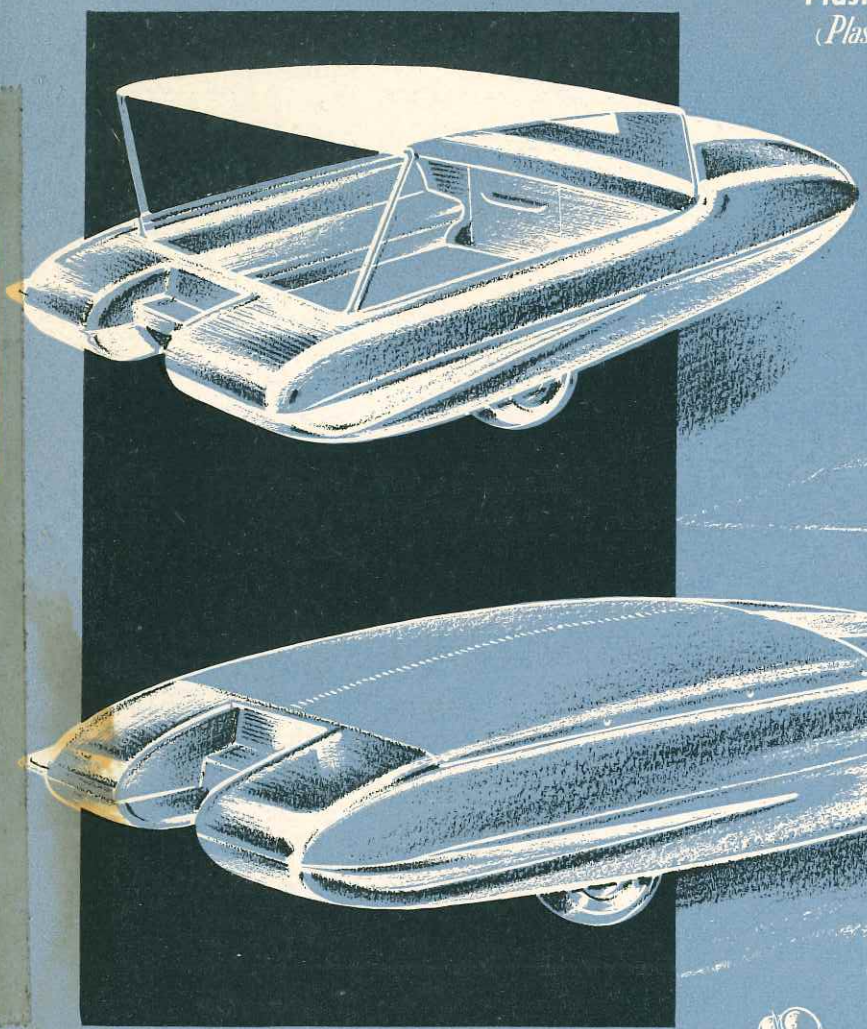
ON THE DRAFTING BOARD

Drawings by Julian Krupa, *Plastics* Art Staff

A Presentation of the Potential Applications of Plastics as Visualized by Industrial Designers

(*Plastics* welcomes designers' contributions to this department)

P48



Entire body of boat trailer is conceived as a fiber glass polyester resin laminate. Upholstery might be of vinyl material, and the fitments of butyrate, acrylic, etc. But the main point is that the body would be a low pressure molded laminate.
